

**z2t\_ID** (int, max size: 10) - A unique number generated by Zip2Tax for reference purposes.

**ZIP Code** (string, max size: 50) - (Zone Improvement Plan) code; a system of 5-digit codes that identifies the individual post office or metropolitan area delivery station associated with an address.

**Sales Tax Rate\*** (currency, max size: 10) - The combined state, county and local taxes associated with an area's ZIP code.

**Rate State** (currency, max size: 10) - The portion of the sales tax remitted to the state.

**Reporting Code State** (string, max size: 50) - Some states use a reporting code, often an abbreviation of the jurisdiction, (ex: CG for "city of Casa Grande, AZ) or sometimes a numeric code decided by the state. This field will be left blank for those states that do not require reporting codes.

**Rate County** (currency, max size: 10) - The portion of the sales tax remitted to the county.

**Reporting Code County** (string, max size: 50) - Some counties use a reporting code. This field will be left blank for those counties that do not require reporting codes.

**Rate City** (currency, max size: 10) - The portion of the sales tax remitted to the city.

**Reporting Code City** (string, max size: 50) - Some cities use a reporting code. This field will be left blank for those cities that do not require reporting codes.

**Rate Special District** (currency, max size: 10) - The portion of the sales tax remitted to a special district. This district could be a school system, a service authority – often related to utilities or transportation – or other municipality designated for taxation purposes such as police, fire or ambulance.

**Reporting Code Special District** (string, max size: 50) - Some special districts use a reporting code. This field will be left blank for those special districts that do not require reporting codes.

**City** (string, max size: 50) - An incorporated administrative district established by state charter.

**Post Office** (string, max size: 50) - The name of the city used by the postal service which is not necessarily match the city named above.

**State** (string, max size: 50) - A two letter abbreviation for the state.

**County** (string, max size: 50) - A local level of government below the state or federal territory. Counties are used in 48 of the 50 states, while Louisiana is divided into parishes and Alaska into boroughs.

**Shipping Taxable** (int, max size: 10) -"1" mean shipping is taxable and "0" means no.

**Primary Record** (int, max size: 10) - Some municipalities share ZIP codes. For example: The Arizona city of New River, county of Maricopa, shares the 85087 ZIP code with the City of Phoenix. New River is the location of the post office, therefore it is the Primary Record. A "1" denotes the Primary Record and "0" means this is a shared ZIP code but the other location contains the post office.
